Forecast for Tuesday 10 Nov 2020

Weather: A mainly cloudy day with outbreaks of light and patchy drizzly rain at times, quite a dull and damp feel to the day. Perhaps more in the way of brightness in the morning. Conditions may be slightly better around the more northerly peaks in the park and there may be some cloud breaks here and some brighter spells. Further south lower cloud is likely and more in the way of rain.

Chance of cloud free mountain/hill tops above 800m: In the south of the Lake District, 20% chance of cloud free tops with bases around 3-400m. For the more northerly fells 40% chance of cloud free tops with cloud bases 5-600m.

Visibility: Generally moderate or poor. Visibility may become good for a time in the north.
